

24/7 ONLINE TRACKING

ANY PARCEL, ANYWHERE

# ABOUT GREYHOUND FREIGHT

## HISTORY

*Greyhound Freight has been running as long as Greyhound buses have, that's more than 100 years! Over that time Greyhound Freight has built up a national network incorporating over 7,200 destinations around the entire country. So no matter where your freight needs to go, Greyhound Freight can get it there anywhere, anytime.*

## ECONOMICAL:

Because Greyhound Freight is using a network that is currently running to carry bus passengers, it doesn't cost much to put a parcel on a bus that is already going, which makes us Australia's most affordable parcel delivery service\*.

## EASY TRACKING:

We have the latest tracking system to be able to track your parcel from A to B and ensure it gets there on time. You can access this system 24/7, 365 days of the year online or call our friendly call centre to find out where your freight is.

## AUSTRALIA WIDE:

Not only do we go to every major capital city and town all around Australia, but we also go to many places that the others don't or will charge you an arm and a leg to get to. And with so many bus services running each and every day between major metro cities (sometimes more than airlines) we are able to get your freight from one city to the next extremely quickly. For example from Canberra to Sydney we operate 9 daily services each way, so every couple of hours a Greyhound bus is departing - no other transport company operates that often. This means your freight can reach its destination quicker.

## RELIABLE:

Our staff treat your parcel like it is their own and with our coaches running to a set timetable, you'll know exactly when your freight will arrive.
